

EHSAAS-E-SHAJAR
2026

Province-Wide Climate Action Movement

Evidence-Based | Data-Driven | Digitally Verified

23 March, 2026

THE CHIEF MINISTER

Given the international scenario of fight against climate change the provincial Government of Khyber Pakhtunkhwa came up with an innovative idea of celebrating the 23rd March 2026 (being Pakistan Day) by planting more than a million saplings across the province. Owing to the global unrest the soothing idea of enhancing green cover through involvement of the active participation of the general masses was coined. The initiative is part of the broader vision and continuation of the goal towards greener Pakistan.

Ehsaas e Shajar, is the feeling of the entire nation to pay tribute to the sacrifices made by Muslims of the sub-continent under the auspices of the leadership of Great Quaid-e-Azam. The drive is a provincial plantation initiative aimed at promoting environmental sustainability and climate resilience and adoption across Khyber Pakhtunkhwa. The initiative reflects the spirit of plantation and a shared sense of responsibility and care for our environment and future generations.

THE CHIEF SECRETARY

A distinctive feature of this year's campaign is the plantation of more than one million saplings in a single day on March 23rd, 2026, marking Pakistan Day, which also coincides with the third day of Eid ul Fitr. The Forest Department planned for planting 982,417 saplings under Upscaling Green Pakistan Program (UGPP) and Billion Tree Afforestation Support Project (BTASP), while an additional 92,732 saplings were to be planted by educational institutions and government organizations. Apart from this the citizens are also encouraged to plant and upload the pictures on the App, exclusively made for the purpose by the KP IT Board, of the trees planted on the occasion

To enhance transparency and public engagement, a dedicated digital application has been introduced, enabling citizens to upload photographs of their planted saplings and actively contribute towards the campaign. A centralized control room and specialized monitoring software have been established to oversee the campaign, with real-time monitoring through mobile images and live video feeds displayed on a central dashboard.

All government departments, educational institutions, community groups, civil society organizations, and law enforcement personnel actively participated in the drive. The public played their part by planting at least one sapling. Despite challenges such as conflict and terrorism, the province is demonstrating a strong commitment to climate action through the Ehsaas Afforestation initiative.

Introduction

The Government of Khyber Pakhtunkhwa transformed the vision of Chief Minister Mr. Sohail Afridi of establishing a national record of planting highest number of plants in a single day to raise awareness and sense of responsibility among masses to combat vagaries of climate change and enhance the green cover of the province, on 23rd March, 2026 (Pakistan Day).

Key Operational Steps

- 🌲 Coordination & Mobilization of Allied Departments and stakeholder-January, 2026.
- 🌲 Sites selection and focal person for each plantation site nomination- January, 2026.
- 🌲 Development of digital platform for real time reporting, monitoring & transparency – February, 2026.
- 🌲 Mobilization of education institutions and capacity building of focal persons – February & March, 2026.
- 🌲 Labor mobilization to plantation sites for pits digging at plantation sites-1st week of March, 2026.
- 🌲 Training on live streaming, capturing geo-tagged photos / videos, and application-based reporting on App- 2nd week of March, 2026.
- 🌲 Transportation arrangements for students from schools to plantation sites and coordination with institutions- 2nd week of March, 2026.
- 🌲 Preparation of banners, awareness materials and coordination for effective media coverage-1st & 2nd week of March, 2026.
- 🌲 Plantation, reporting, monitoring of Plantation-23rd march 2026

Key Achievements

1. From Vision to Movement

Ehsaas-e-Shajar was conceived as a historic, province-wide plantation initiative, aligning environmental action with national identity. The Ehsaas-e-Shajar initiative represented a unique convergence of national spirit and environmental responsibility. Conceived under the vision of the Honorable Chief Minister, the idea was to transform Pakistan Day (23rd March 2026) into a province-wide climate action movement, where every citizen, institution, and government entity contributes towards a greener Khyber Pakhtunkhwa.

During a presentation made to the Honorable Chief Minister of Khyber Pakhtunkhwa on 6th January 2026 regarding the progress of Upscaling of the Green Pakistan Program, previously 10-Billion Tree Tsunami Program(10-BTTP), the Honorable Chief Minister directed that 23 March 2026 be observed as Ehsaas-e-Shajar, which laid the foundation for a province-wide plantation campaign of historic scale and significance on the Pakistan day.

This vision of Chief Minister positioned plantation not merely as an environmental activity, but as a social movement driven by ownership, participation, and sustainability.

2. Province-Wide Coverage

Plantation carried out across all districts and regions of Khyber Pakhtunkhwa at 285 sites.

3. Evidence-Based and Digitally Verified Execution

A defining feature of this initiative was its fully digitized and evidence-based monitoring system. Every plantation activity was:

- 🌲 Geo-tagged to capture exact location and eliminate duplication
- 🌲 Supported with photographic and video evidence from the field
- 🌲 Tracked in real-time through a centralized dashboard
- 🌲 Validated through compliance mechanisms before final reporting

4. Turning Ambition into Reality

Ehsaas-e-Shajar was conceived as a historic, province-wide plantation initiative, aligning environmental action with national identity. The Ehsaas-e-Shajar initiative represented a unique convergence of national spirit and environmental responsibility. Conceived under the vision of the Honorable Chief Minister, the idea was to transform Pakistan Day (23rd March 2026) into a province-wide climate action movement, where every citizen, institution, and government entity contributes towards a greener Khyber Pakhtunkhwa.

- 🌲 Planting over one million saplings in a single day was not merely an operational success, but the outcome of meticulous planning, strong political commitment, and coordinated execution across multiple tiers of government and society.
- 🌲 Ambitious target transformed into a practical and achievable milestone through visionary leadership, institutional alignment, and proactive preparation.
- 🌲 Establishment of digital dashboard for departmental use along with a mobile application for real-time plantation data entry from the field.
- 🌲 Series of meetings were held on 17 February, 3 March, and 9 March 2026 under the guidance of the Additional Chief Secretary (General), Khyber Pakhtunkhwa, in collaboration with the KP IT Board.
- 🌲 PMU provided a detailed list of plantation sites designated for the Forest Department and educational institutions, along with the details of focal persons and supervisory district offices.
- 🌲 Public participation in Ehsaas-e-Shajar ensured that the initiative was not only participatory but also transparent and evidence-based.

Training on Digital Reporting & Monitoring for Forest & Education focal persons

5. Mobilizing Youth and Academia

A cornerstone of the planning process was the active engagement of youth and academia recognizing their role in shaping long-term environmental behavior through their involvement.

6. External Monitoring Accreditation

For External Monitoring Accreditation, the World Wide Fund for Nature (WWF) was formally requested by the government to carry out physical progress monitoring. The WWF performed the monitoring on the same day and submitted the report to the government, wherein the achievement was verified and authenticated. Furthermore the report revealed that earthwork (pit size), choice of species, health of planting stock and participation of citizens was successful

7. Digital Innovation – Redefining Climate Governance

A digital platform was provided by KP IT Board to integrate field-level mobile application with a centralized monitoring dashboard, enabling geo-tagged reporting, activity-based checklists, and evidence-based verification through photos and videos. Supported by a central control room and high-availability infrastructure, the system transformed traditional plantation drive into a data-driven, digitally governed climate action model.

Application Workflow

8. Mobile Application for the Field Officers

Dedicated Mobile Application available on Play Store and App Store

·Play store: <https://play.google.com/store/apps/details?id=com.kpitb.plantation.drive.app>

·App Store - iOS (test-flight): <https://testflight.apple.com/join/mT6pfDvz>

9. Public Participation Mechanism

A structured digital mechanism was introduced to actively engage citizens in the plantation drive and formally recognize their contributions. Citizens were enabled to participate, register their contributions through the online platform and submit entries.

Public Submission Interface for Plantation Reporting via Dashboard and Dastak App

11. Hourly Plantation Report

12. Citizen-Centric Climate Action

A defining feature of Ehsaas-e-Shajar was its transition from a government-led initiative to a citizen-driven movement, where individuals were not merely participants but active partners in environmental governance.

For the first time, a structured digital mechanism enabled citizens to contribute, report, and be recognized for their plantation efforts. This marked a significant shift towards inclusive and participatory climate action, strengthening the bond between government and citizens.

Disclaimer

The efforts made by the youth, women, students, elderly citizens, ruler & urban masses are worth appreciable and morale boosting for the government as well as Forest Department, Khyber Pakhtunkhwa. On 23rd March 90,000 number of plants have reportedly been planted by the general public however the same are not accounted towards the overall progress on the basis that it is difficult to authenticate the actual number of seedlings planted.

The details of plantations along with sites, GPS coordinates, number of plants and species are part of this report and added at the end.

13. Key Takeaways and Analysis - PMRU

- Maximum saplings planted in Swat, Mansehra, Abbottabad.
- These districts were chosen due to temperate climatic conditions given the time of year.
- Maximum number of sites chosen for plantation in Peshawar, Swat, Abbottabad, Mansehra and Kohat.

- Plantation effort is distributed across site type categories to ensure survivability of saplings.
- Schools/Colleges were chosen as majority of sites across most districts to educate the youth to the importance of the campaign.
- Communal were chosen where available to allow community participation and ownership of newly created forest cover.

14. Carbon Impact (25-year Projection)

The plantation campaign across Khyber Pakhtunkhwa is projected to sequester roughly 410,000 tons of CO₂ over an average 25 years life span of trees, based on current plantation data and a conservative survival rate of 65% (rate less than 80% International Standard is considered for Factor of Safety). The initiative shows strong environmental impact potential but requires strategic adjustments and targeted improvements in survival rate, land diversification, and district performance to maximize long term carbon impact benefits.

Carbon Impact Summary

Total Saplings Planted	1,076,019
Estimated Survival Rate	~ 65%
Effective Trees (Surviving)	682,500
Average CO ₂ Absorption per Tree (1 yrs)	10.0 kg
CO ₂ Absorption per Tree (25 yrs)	0.25 tons
Total Carbon Sequestration	266,175 tons CO ₂

Keys Takeaways

Financial Impact:

A total impact of nearly \$0.5 – \$1.7 million is expected over 25 years period.

Variation Efficiency:

Significant variation in plantations per site to ensure survivability.

Land Utilization:

Reliance on Schools/Colleges sites in some districts for survivability.

Forest Areas:

High plantation in public lands contributes to net gain in new green cover.

Survival Rate:

Survival rate improvement is the single biggest driver of carbon impact.

15. Way Forward

While the plantation drive achieved its targets successfully, the true measure of success lies in survival and long-term growth of planted saplings.

Pictorial Glimpses

Pictorial Glimpses from the 285 plantation sites as well as the Chief Minister, elected representatives, the Chief Secretary, other officers are added as a vivid testament to unity, environmental stewardship, and a shared commitment to nurturing a more verdant and sustainable future for Khyber Pakhtunkhwa.

The Deputy Commissioners especially planted fruit trees in government residential premises towards ensuring sustainable eco-system for birds and other wildlife.
